Field Network Engineer

Job Title: Network Engineer (Field)
Location: Pune
Experience: 0–1 Year
Job Type: Full-Time

Job Summary:

We are looking for a motivated and enthusiastic Network Engineer to support on-site network installations and basic troubleshooting activities. This is a field-based role ideal for freshers or candidates starting their careers in networking.

This role involves fieldwork, and so two-wheeler is mandatory.

Skills & Responsibilities:

- Assist in installation and configuration of routers, switches, and networking equipment at client locations
- Support basic network setup including IP addressing, cabling, and connectivity checks
- Perform initial troubleshooting of network issues and escalate when required
- Coordinate with senior engineers and internal teams for issue resolution
- Work closely with ISPs for link installation and basic issue follow-ups
- Handle site visits, device installation, and maintenance activities
- Basic understanding of networking concepts such as TCP/IP, DNS, and OSI Model
- Maintain and update installation or service status
- Good communication skills for client interaction at site

Qualifications:

- Graduate / Diploma in IT, Computer Science, Electronics, or related field
- Basic knowledge of networking (CCNA is a plus)
- 0–1 year of experience (Freshers can apply)
